R10 RAINWATER DRAINAGE SYSTEMS

365 PROPRIETARY RAINWATER OUTLETS:

Fullflow Self Priming Syphonic Roof Drainage System

Fullflow manufacture a Self Priming syphonic roof drainage system (specify in clause 121) which consists of Primaflow® Self Priming syphonic roof outlets and associated pipework.

Fullflow Primaflow® Self Priming syphonic rainwater outlets are be manufactured in the United Kingdom within a ISO 9001 Quality Assurance environment. They are designed for use with the related analytical design software and must carry the British Board of Agreement certificate number 96/3279 second issue. The use of alternative 'head above' syphonic rainwater outlets or gravity rainwater outlets in a Fullflow system is not permitted.

Fullflow Primaflow® outlets comprise an upper flange which facilitates fixing to the gutter sole, with a lower bowl of circular section and outlet spigot below of a smaller diameter. A device is located within the bowl and spigot sections of the Fullflow Primaflow® Roof Outlet below the gutter sole which prevents the formation of vortices and the subsequent entrainment of air, enabling the designed pipework to flow full of water at the design rainfall intensity and induce syphonic action below the gutter sole. All in accordance with patent No. 93 15878.0. Outlets are available to suit any roof configuration. Please contact Fullflow Group Limited Technical Department for details. As syphonic systems have to be designed to suit each individual application, using a computer aided design process, Fullflow Group Ltd provide a full design and specification service combined with a project management system to oversee the project from design to on-site completion and it is recommended that they are consulted early in the design process.

Manufacturer: Fullflow Group Ltd. Fullflow House, Holbrook Avenue, Holbrook, Sheffield. S20 3FF. Tel: 0114 247 3655. Fax: 0114 247 7805. Email: Info@uk.fullflow.com web: www.fullflow.com

Product reference: Primaflow Self Priming Patented Outlets

Type: Syphonic

Roof construction: *Insert requirements*

Type of grate/ fittings: *Insert requirements.* Consult Fullflow Group Ltd technical literature for details.

Outlet: Type and direction to suit pipework with adaptors and connections.

Fixing: Consult Fullflow Group Ltd technical literature for details.
