R10 RAINWATER DRAINAGE SYSTEMS

630 INSTALLING RAINWATER OUTLETS:

Fullflow Self Priming Syphonic Roof Drainage System.

Fullflow manufacture a Self Priming syphonic roof drainage system which consists of Primaflow® Self Priming syphonic roof outlets and associated pipework.

Create a revised clause 630A and complete as follows. Consult Fullflow Group Ltd technical literature for details. As syphonic systems have to be designed to suit each individual application, using a computer aided design process, Fullflow Group Ltd provide a full design and specification service combined with a project management system to oversee the project from design to on-site completion and it is recommended that they are consulted early in the design process.

630A INSTALLING RAINWATER OUTLETS:

Fixing: Outlets to be issued to nominated gutter manufacturer/roofing contractor for installation into roof/gutter via approved fixing method. Outlets can be fixed to gutters by hot air welding, mechanical fixing or metallic welding. Outlets can be clamp ring, PVC Coated or standard flanged. Junctions between outlets and pipework: Where necessary, to accommodate movement in structure and pipework.
